

Textbook Development Committee

CHAIRPERSON, ADVISORY GROUP IN SCIENCE AND MATHEMATICS

J.V. Narlikar, *Emeritus Professor*, Inter-University Centre for Astronomy & Astrophysics (IUCAA), Ganeshkhind, Pune University, Pune

CHIEF ADVISORS

P. Sinclair, *Professor* of Mathematics, IGNOU, New Delhi

G.P. Dikshit, *Professor (Retd.)*, Lucknow University, Lucknow

CHIEF COORDINATOR

Hukum Singh, *Professor and Head (Retd.)*, DESM, NCERT, New Delhi

MEMBERS

Anjali Lal, *PGT*, DAV Public School, Sector-14, Gurgaon

A.K. Wazalwar, *Professor and Head*, DESM, NCERT

B.S. Upadhyaya, *Professor*, RIE, Mysore

Jayanti Datta, *PGT*, Salwan Public School, Gurgaon

Mahendra Shanker, *Lecturer (S.G.) (Retd.)*, NCERT

Manica Aggarwal, Green Park, New Delhi

N.D. Shukla, *Professor (Retd.)*, Lucknow University, Lucknow

Ram Avtar, *Professor (Retd.) & Consultant*, DESM, NCERT

Rama Balaji, *TGT*, K.V., MEG & Centre, St. John's Road, Bangalore

S. Jagdeeshan, *Teacher and Member*, Governing Council, Centre for Learning, Bangalore

S.K.S. Gautam, *Professor (Retd.)*, DESM, NCERT

Vandita Kalra, *Lecturer*, Sarvodaya Kanya Vidyalaya, Vikaspuri District Centre, Delhi

V.A. Sujatha, *TGT*, Kendriya Vidyalaya No. 1, Vasco, Goa

V. Madhavi, *TGT*, Sanskriti School, Chankyapuri, New Delhi

MEMBER-COORDINATOR

R.P. Maurya, *Professor*, DESM, NCERT, New Delhi

Acknowledgements

The Council gratefully acknowledges the valuable contributions of the following participants of the Textbook Review Workshop:

Mala Mani, *TGT*, Amity International School, Sector-44, Noida; Meera Mahadevan, *TGT*, Atomic Energy Central School, No. 4, Anushakti Nagar, Mumbai; Rashmi Rana, *TGT*, D.A.V. Public School, Pushpanjali Enclave, Pitampura, Delhi; Mohammad Qasim, *TGT*, Anglo Arabic Senior Secondary School, Ajmeri Gate, Delhi; S.C. Rauto, *TGT*, Central School for Tibetans, Happy Valley, Mussoorie; Rakesh Kaushik, *TGT*, Sainik School, Kunjpura, Karnal; Ashok Kumar Gupta, *TGT*, Jawahar Navodaya Vidyalaya, Dudhnoi, Distt. Goalpara; Sankar Misra, *TGT*, Demonstration Multipurpose School, RIE, Bhubaneswar; Uday Singh, *Lecturer*, Department of Mathematics, B.H.U., Varanasi; B.R. Handa, *Emeritus Professor*, IIT, New Delhi; Monika Singh, *Lecturer*, Sri Ram College (University of Delhi), Lajpat Nagar, New Delhi; G. Sri Hari Babu, *TGT*, Jawahar Navodaya Vidyalaya, Sirpur, Kagaz Nagar, Adilabad; Ajay Kumar Singh, *TGT*, Ramjas Sr. Secondary School No. 3, Chandni Chowk, Delhi; Mukesh Kumar Agrawal, *TGT*, S.S.A.P.G.B.S.S. School, Sector-V, Dr Ambedkar Nagar, New Delhi.

Special thanks are due to Professor Hukum Singh, *Head (Retd.)*, DESM, NCERT for his support during the development of this book.

The Council acknowledges the efforts of Deepak Kapoor, *Incharge*, Computer Station; Purnendu Kumar Barik, *Copy Editor*; Naresh Kumar and Nargis Islam, *D.T.P. Operators*; Yogita Sharma, *Proof Reader*.

The Contribution of APC-Office, administration of DESM, Publication Department and Secretariat of NCERT is also duly acknowledged.

Contents

<i>Foreword</i>	<i>iii</i>
<i>Rationalisation of Contents in the Textbooks</i>	<i>v</i>
<i>Preface</i>	<i>vii</i>
1. Real Numbers	1
1.1 Introduction	1
1.2 The Fundamental Theorem of Arithmetic	2
1.3 Revisiting Irrational Numbers	6
1.4 Summary	9
2. Polynomials	10
2.1 Introduction	10
2.2 Geometrical Meaning of the Zeroes of a Polynomial	11
2.3 Relationship between Zeroes and Coefficients of a Polynomial	18
2.4 Summary	23
3. Pair of Linear Equations in Two Variables	24
3.1 Introduction	24
3.2 Graphical Method of Solution of a Pair of Linear Equations	25
3.3 Algebraic Methods of Solving a Pair of Linear Equations	30
3.3.1 Substitution Method	30
3.3.2 Elimination Method	34
3.4 Summary	37
4. Quadratic Equations	38
4.1 Introduction	38
4.2 Quadratic Equations	39
4.3 Solution of a Quadratic Equation by Factorisation	42
4.4 Nature of Roots	44
4.5 Summary	47
5. Arithmetic Progressions	49
5.1 Introduction	49

5.2	Arithmetic Progressions	51
5.3	n th Term of an AP	56
5.4	Sum of First n Terms of an AP	63
5.5	Summary	72
6.	Triangles	73
6.1	Introduction	73
6.2	Similar Figures	74
6.3	Similarity of Triangles	79
6.4	Criteria for Similarity of Triangles	85
6.5	Summary	97
7.	Coordinate Geometry	99
7.1	Introduction	99
7.2	Distance Formula	100
7.3	Section Formula	106
7.4	Summary	112
8.	Introduction to Trigonometry	113
8.1	Introduction	113
8.2	Trigonometric Ratios	114
8.3	Trigonometric Ratios of Some Specific Angles	121
8.4	Trigonometric Identities	128
8.5	Summary	132
9.	Some Applications of Trigonometry	133
9.1	Heights and Distances	133
9.2	Summary	143
10.	Circles	144
10.1	Introduction	144
10.2	Tangent to a Circle	145
10.3	Number of Tangents from a Point on a Circle	147
10.4	Summary	153
11.	Areas Related to Circles	154
11.1	Areas of Sector and Segment of a Circle	154
11.2	Summary	160

12. Surface Areas and Volumes	161
12.1 Introduction	161
12.2 Surface Area of a Combination of Solids	162
12.3 Volume of a Combination of Solids	167
12.4 Summary	170
13. Statistics	171
13.1 Introduction	171
13.2 Mean of Grouped Data	171
13.3 Mode of Grouped Data	183
13.4 Median of Grouped Data	188
13.5 Summary	200
14. Probability	202
14.1 Probability — A Theoretical Approach	202
14.2 Summary	217
Appendix A1 : Proofs in Mathematics	218
A1.1 Introduction	218
A1.2 Mathematical Statements Revisited	218
A1.3 Deductive Reasoning	221
A1.4 Conjectures, Theorems, Proofs and Mathematical Reasoning	223
A1.5 Negation of a Statement	228
A1.6 Converse of a Statement	231
A1.7 Proof by Contradiction	234
A1.8 Summary	238
Appendix A2 : Mathematical Modelling	239
A2.1 Introduction	239
A2.2 Stages in Mathematical Modelling	240
A2.3 Some Illustrations	244
A2.4 Why is Mathematical Modelling Important?	248
A2.5 Summary	249
Answers/Hints	250

Constitution of India

Part IV A (Article 51 A)

Fundamental Duties

It shall be the duty of every citizen of India —

- (a) to abide by the Constitution and respect its ideals and institutions, the National Flag and the National Anthem;
- (b) to cherish and follow the noble ideals which inspired our national struggle for freedom;
- (c) to uphold and protect the sovereignty, unity and integrity of India;
- (d) to defend the country and render national service when called upon to do so;
- (e) to promote harmony and the spirit of common brotherhood amongst all the people of India transcending religious, linguistic and regional or sectional diversities; to renounce practices derogatory to the dignity of women;
- (f) to value and preserve the rich heritage of our composite culture;
- (g) to protect and improve the natural environment including forests, lakes, rivers, wildlife and to have compassion for living creatures;
- (h) to develop the scientific temper, humanism and the spirit of inquiry and reform;
- (i) to safeguard public property and to abjure violence;
- (j) to strive towards excellence in all spheres of individual and collective activity so that the nation constantly rises to higher levels of endeavour and achievement;
- *(k) who is a parent or guardian, to provide opportunities for education to his child or, as the case may be, ward between the age of six and fourteen years.

Note: The Article 51A containing Fundamental Duties was inserted by the Constitution (42nd Amendment) Act, 1976 (with effect from 3 January 1977).

*(k) was inserted by the Constitution (86th Amendment) Act, 2002 (with effect from 1 April 2010).

REAL NUMBERS

1

1.1 Introduction

In Class IX, you began your exploration of the world of real numbers and encountered irrational numbers. We continue our discussion on real numbers in this chapter. We begin with very important properties of positive integers in Sections 1.2, namely the Euclid's division algorithm and the Fundamental Theorem of Arithmetic.

Euclid's division algorithm, as the name suggests, has to do with divisibility of integers. Stated simply, it says any positive integer a can be divided by another positive integer b in such a way that it leaves a remainder r that is smaller than b . Many of you probably recognise this as the usual long division process. Although this result is quite easy to state and understand, it has many applications related to the divisibility properties of integers. We touch upon a few of them, and use it mainly to compute the HCF of two positive integers.

The Fundamental Theorem of Arithmetic, on the other hand, has to do something with multiplication of positive integers. You already know that every composite number can be expressed as a product of primes in a unique way—this important fact is the Fundamental Theorem of Arithmetic. Again, while it is a result that is easy to state and understand, it has some very deep and significant applications in the field of mathematics. We use the Fundamental Theorem of Arithmetic for two main applications. First, we use it to prove the irrationality of many of the numbers you studied in Class IX, such as $\sqrt{2}$, $\sqrt{3}$ and $\sqrt{5}$. Second, we apply this theorem to explore when exactly the decimal expansion of a rational number, say $\frac{p}{q}$ ($q \neq 0$), is terminating and when it is non-terminating repeating. We do so by looking at the prime factorisation of the denominator q of $\frac{p}{q}$. You will see that the prime factorisation of q will completely reveal the nature of the decimal expansion of $\frac{p}{q}$.

So let us begin our exploration.

1.2 The Fundamental Theorem of Arithmetic

In your earlier classes, you have seen that any natural number can be written as a product of its prime factors. For instance, $2 = 2$, $4 = 2 \times 2$, $253 = 11 \times 23$, and so on. Now, let us try and look at natural numbers from the other direction. That is, can any natural number be obtained by multiplying prime numbers? Let us see.

Take any collection of prime numbers, say 2, 3, 7, 11 and 23. If we multiply some or all of these numbers, allowing them to repeat as many times as we wish, we can produce a large collection of positive integers (In fact, infinitely many). Let us list a few :

$$7 \times 11 \times 23 = 1771$$

$$3 \times 7 \times 11 \times 23 = 5313$$

$$2 \times 3 \times 7 \times 11 \times 23 = 10626$$

$$2^3 \times 3 \times 7^3 = 8232$$

$$2^2 \times 3 \times 7 \times 11 \times 23 = 21252$$

and so on.

Now, let us suppose your collection of primes includes all the possible primes. What is your guess about the size of this collection? Does it contain only a finite number of integers, or infinitely many? Infact, there are infinitely many primes. So, if we combine all these primes in all possible ways, we will get an infinite collection of numbers, all the primes and all possible products of primes. The question is – can we produce all the composite numbers this way? What do you think? Do you think that there may be a composite number which is not the product of powers of primes? Before we answer this, let us factorise positive integers, that is, do the opposite of what we have done so far.

We are going to use the factor tree with which you are all familiar. Let us take some large number, say, 32760, and factorise it as shown.
